

The Platt Skate Mount is designed for installation on a vehicle's rollover protection systems or other light structures. Its unique large skate rail provides wide and adjustable arcs of fire for the gunner in a lightweight package, making it an ideal weapon mount solution for soft-skinned, open-topped patrol, reconnaissance and special forces vehicles.

Currently in service with Australian Army's G-Wagon SRVs

KEY FEATURES

- Quick reaction with wide arcs of fire
- Multi-weapon cradle compatible with LMGs and GPMGs
- Travel lock and separate cans for 5.56-7.62mm ammunition
- Cost-effective, lightweight and modular design
